

THE SURREY ECONOMY: ANNUAL REPORT & ACCOUNTS

THE SURREY CORPORATE SOCIAL RESPONSIBILITY INDEX

COMMISSIONED BY

The information for the Corporate Social Responsibility Index identifies the donations made to charities and community organisations by the largest companies in Surrey. The amounts are also expressed as a percentage of pre-tax profits. A dash in any of the columns means that no figure is available for the year in question. Where the letter L appears in a column it means that the calculation could not be done because the company in question made a loss for that year but still made donations. A number of companies will also contribute to their communities in other ways, such as encouraging their staff in local projects or by the use of product or facilities, and these won't always be reflected in the figures.

To qualify for inclusion, a company has its functioning head office or registered office at which directors are based within Surrey.

If a company has a number of sites in the UK, and its accounts reflect them all, then it is included only if its base within Surrey is considered to be its main location.

Where a number of companies are part of a group which is also based in the county, and the accounts are consolidated, then the group company is the one which is included. If a number of companies in Surrey are part of a group which has its head office elsewhere, then the individual companies will each be listed with their own specific figures.

No existing ranking or format exists as a basis for the information which has been compiled solely by DECISION business magazine on behalf of Hart Brown. The information is according to the latest audited accounts filed or made available by Thursday 12th May 2011. Accounts for any company whose latest accounts on this date were for a year-end before December 31st 2009 have not been included.
